

THESIS WRITING GUIDELINES

Dr. Arif Mahmud

Associate Professor & Associate Head

Department of CSE, Daffodil International University

TEMPLATE

- Follow the template properly
- <https://docs.google.com/document/d/1RefrffGqICyKxnBiGQIDZuZS3w5tF9PL/edit?usp=sharing&oid=115592112345823669860&rtpof=true&sd=true>

ELEMENTS

- Abstract
- Introduction
- Background and Literature review
- Methodology/model
- Implementation (Optional)
- Results (can be merged with Implementation too)
- Discussion and Conclusion (include Implications, Limitations and Future Work)
- References
- N.B: All the chapters have to be interlinked and dependent on each other

INTRODUCTION

Think of the introduction as a mental road map that must answer for the reader these four questions:

- What was I studying?
- Why was this topic important to investigate?
- What did we know about this topic before I did this study?
- How will this study advance our knowledge?
- Suggestions: 5-7 pages at BSc level (1500+ words)

BACKGROUND

- The background of the study establishes the context of the research. This section explains why this particular research topic is important and essential to understanding the main aspects of the study. Usually, the background forms the first section of a research article/thesis and justifies the need for conducting the study and summarizes what the study aims to achieve.
- Suggestions: 3-5 pages at BSc level (1500+ words)

LITERATURE REVIEW

- A literature review is a comprehensive summary of previous research on a topic. The literature review surveys scholarly articles, books, and other sources relevant to a particular area of research. The review should enumerate, describe, summarize, objectively evaluate and clarify this previous research.
- Suggestions: 8-12 pages at BSc level (2500+ words)

METHODOLOGY/MODEL

- Methodology in research is defined as the systematic method to resolve a research problem through data gathering using various techniques, providing an interpretation of data gathered and drawing conclusions about the research data.
- Suggestions: 8-10 pages at BSc level (2500+ words)

IMPLEMENTATION

- Implementation research is an integrated concept that links research and practice to accelerate the development and delivery of methods/approaches. Implementation involves the creation and application of knowledge to improve the implementation of policies, programs, and practices
- Suggestions: 8-10 pages at BSc level (2500+ words)

RESULTS

The results section is where you report the findings of your study based upon the methodology you applied to gather information. The results section should state the findings of the research arranged in a logical sequence without bias or interpretation.

Suggestions: 5-10 pages at BSc level (1500+ words)

DISCUSSION

- The purpose of the discussion is to interpret and describe the significance of your findings in light of what was already known about the research problem being investigated and to explain any new understanding or insights that emerged as a result of your study of the problem.
- Suggestions: 5-10 pages at BSc level (1500+ words)

CONCLUSION AND IMPLICATIONS

- In conclusion, answer the research questions that you proposed in 1st chapter
- Example:
- As per answer of RQ1... according to RQ2 ..
- In implications, highlight theoretical and practical (or methodological contribution). I mean what are new factors/modifications you have included in your theory (algorithms), practically or methodologically.
- In limitations and future works, highlight 2-3 issues that can be solved within 3-6 months of time.

REFERENCES

- Referencing can be described as giving credit, with citation, to the source of information used in one's work. Research is a buildup on what other people have previously done thus referencing helps to relate your own work to previous work. Unacknowledged use and presenting someone else's ideas as if they were your own can be used to describe plagiarism.
- Suggestions: 30+ references at BSc level
